Little Black Box Low Coolant Level Alarm

Monitors the coolant and gives an audible alarm if level falls below safe limit.

Fail-safe circuit ensures unit and sensor integrity.

3 second delay – prevents false alarms when coming or traversing rough terrain

Dual LED indicator – Green / Red display

Quiet switch – stop the audible alarm once you are alerted.

Choice of coolant sensor – Float switch or probe for header tank or radiator.

Fully encapsulated for reliability

Radiator probe kit

Header tank float switch
